

Bug on Steemit account value

Hi Steemian!

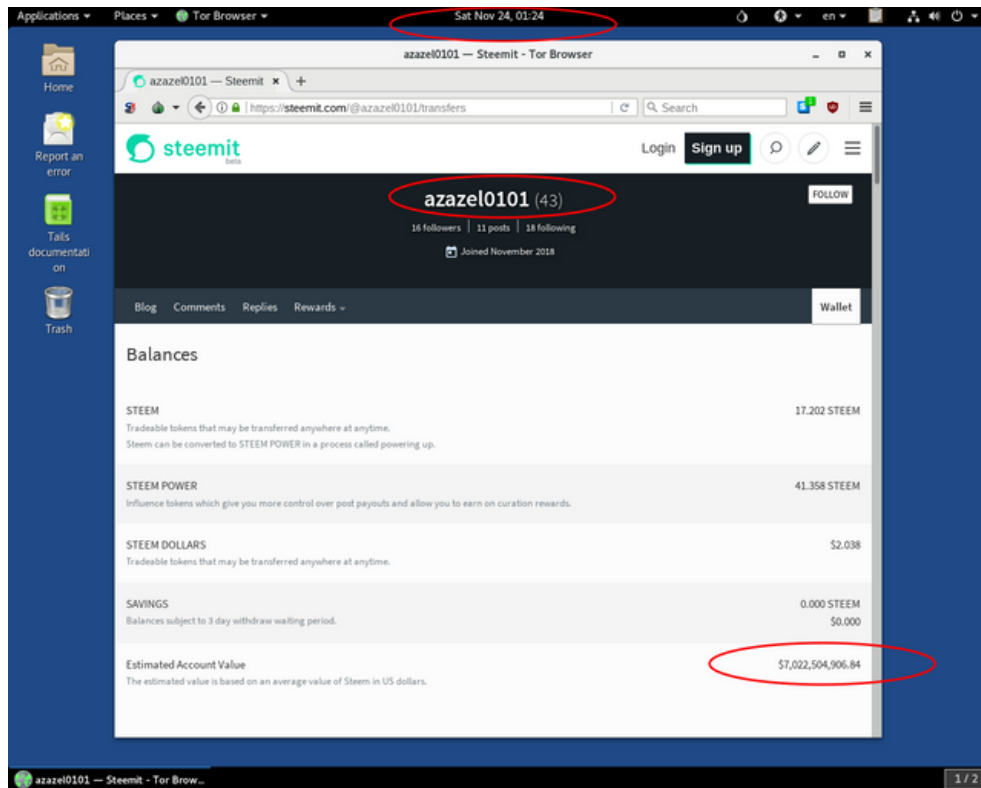

Does anyone know what this is?

The screenshot shows the Steemit profile page for the account 'azazel0101'. The account has 15 followers, 11 posts, and 18 following. It was joined in November 2018. The 'Balances' section lists the following assets:

Asset	Value
STEEM	21.192 STEEM
STEEM POWER	41.354 STEEM
STEEM DOLLARS	\$2.037
SAVINGS	0.000 STEEM \$0.000
Estimated Account Value	\$7,660,041,737.42

The estimated account value is circled in red. The date 'Thu Nov 22, 07:31' is also circled in red at the top of the browser window.

This is a duplicate of the screenshot above, showing the same Steemit account page for 'azazel0101' with the same balances and estimated account value of \$7,660,041,737.42. The date 'Thu Nov 22, 07:31' is also circled in red at the top of the browser window.

For a few days i was rich
Has this happened to any of you?

please comment!

and do not forge visit my site:
